Uppsala University, Sweden

Visva-Bharati, Shantiniketan, India

www.aimt.ac.in/seminar-and-conferences.php

Introduction

Media is an important stakeholder in regard to societies reaching the goals of sustainable development – both as a contributor and a beneficiary. Media and communication have a relevant role in many aspects of development, ranging from governance through inclusive growth, empowerment, peace and youth involvement. The monopoly of traditional media is gradually being eroded as new media offers speedy, multiple and innovative ways in which companies can better engage with other stakeholders. It is therefore pertinent to take a look at the ways in which societal communication is being reshaped by this evolving communications landscape.

Keeping in mind the requirements of business as well as educational institutions, Army Institute of Management & Technology proudly announces International Conference on “**Media and Communication in Sustainable Development (MCSD-2016)**” in association with APMC India Chapter, Society for Education and Research Development, Indian Institute of Management, Kashipur, Uppsala University, Sweden, Visva-Bharati, Shantiniketan.

Army Institute of Management & Technology (AIMT), Greater Noida was established by Army Welfare Education Society (AWES) in Aug 2004 to cater for the increasing need of professional education for the wards and widows of Army personnel. Army Institute of Management Technology has been ranked 35 in the latest National Institutional ranking by the Ministry of Human Resource & Development, Government of India

A NAAC Accredited; ISO 9001: 2008 Certified Institute, AIMT is affiliated to Guru Gobind Singh Indraprastha University, Delhi which has awarded ‘A’ Grade status to the Institute. Equipped with all modern learning tools/facilities, the Institute aims to provide top class management and education to the students.

International Conference on Media & Communication in Sustainable Development will be an international event with interactions from across the globe on theories, policies, practices and developments in the field of media and communication and sustainable development. The event will be a coming together of international academics, prominent practitioners and innovators in different domains of information systems, communication studies, politics, traditional and new media and their related practices.

Attendees will interact with a variety of industry experts, leading researchers, grass-root level communication workers, development organizations and prominent academics in the field. The conference will combine two days of discussions, demos, plenary, paper, poster and panel sessions. There will be a learning opportunity for young as well as senior delegates. The conference will be, apart from academics equally significant to business leaders, policy makers, communication practitioners and social marketing strategists. The conference will be a significant opportunity to practitioners to have a closer understanding of the academic field as well as the policy sector and market needs. We thus invite participation from a diverse field including (but not limited to):

www.aimt.ac.in/seminar-and-conferences.php

- Industry Leaders and Policy Makers
- Civil Society Organisations
- Grass-root community initiative implementers
- Media Houses
- Independent Practitioners
- Consultants
- Developers
- Academicians
- Researchers
- Students
- Tools and Service Providers

Objectives

Sustainability and development are constantly evolving and contested concepts, based on a global will to improve people's quality of life, including that of future generations, by reconciling economic growth, social development and environmental protection among other things. However, improving the quality of life takes on different courses from one continent to another, from one region to another, one country to the next and most importantly one community context to another. No single region, government, institution or individual, however, can attain this alone because the scope of the challenges and the initiatives needed to overcome these requires a global, collective, as well as individual commitment. Achieving the goals of sustainable development thus requires widespread community education, strong grass-root participatory communications well as a responsible media, committed to encourage an informed and active citizenry. Correspondingly media, in all its forms, has a prominent role to play along with people's own communication in changing the vistas of development. The proposed conference aims to delve into those aspects of media and communication which interact with human beings and their development in a sustainable manner.

Call for Papers

Researchers and practitioners are welcome to submit complete manuscripts or proposal for poster presentations to the conference. The conference will include, but not be limited to four different domains:

- (a) Policy domain,
- (b) Societal and community domain,
- (c) Technological domain
- (d) Business domain.

The purpose is to assess contribution of communication and media in ensuring sustainable development over short and long term with variations of input.

Contribution on application scenarios, use cases, and best practices; research with an empirical focus as well as inter-disciplinary work of conceptualization are especially encouraged. Submissions may include, but are not limited to

- | | |
|---|--|
| 1. Communication Spectrum Analysis | 7. Mobile Communication |
